|-------------------------------------------|-----------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| android.permission.INTERNET               | normal    | full Internet access            | Allows an application to create network sockets.                                                                                                                                                                |
| android.permission.ACCESS_NETWORK_STATE   | normal    | view network status             | Allows an application to view the status of all networks.                                                                                                                                                       |
| android.permission.ACCESS_COARSE_LOCATION | dangerous | coarse (network-based) location | Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are. |
| android.permission.ACCESS_FINE_LOCATION   | dangerous | fine (GPS) location             | Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.     |
